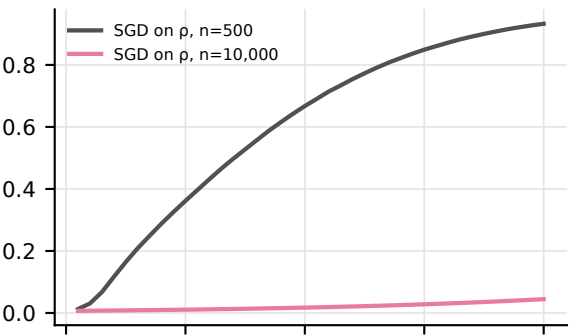
Adam: σ grows on an lr × t clock
mean posterior σ, layer 1
learning rate × steps
adam 5e-4, n=500
adam 1e-3, n=500
adam 2e-3, n=500
adam 5e-4, n=10,000
adam 1e-3, n=10,000
adam 2e-3, n=10,000



SGD on ρ: growth depends on n
steps (×1000)
SGD on ρ, n=500
SGD on ρ, n=10,000
